## Assess your virtual client using these tools:

1. Work through the assessment process in the core areas, in any order.
   We recommend starting here:
   a. **Case History** – interact with the virtual client or caregiver by selecting appropriate questions
   b. **Collaborators** – consult other professionals and family members, select questions and review reports
   c. **Clinical Hypothesis** – record your hypothesis and action plan
   d. **Assessments** – administer age-appropriate standardized and non-standardized tests and procedures
   e. **Diagnosis** – select your diagnoses
   f. **Recommendations** – select your recommendation

   You are scored based on the appropriateness of your decisions.

2. The **Clipboard** saves all of your decisions for review.

3. **Save/Exit** your case to resume at a later time.

4. **Submit** your case upon completion and print your final report.
